

Lifetime Warranty

Program

Hitachi Cable America (HCA) has been hard at work designing and building the most advanced communication cables available. As an indication of how confident we are in the performance of our cables, HCA is proud to offer a lifetime warranty on all certified installations. This covers the HCA cable and the approved connectivity used on the project.

WHY A LIFETIME WARRANTY?

We know our cables perform as well as or better than those of our competitors. Our warranty will cover your network infrastructure for as long as you occupy the building.

Additionally, unlike our competitors, we will transfer that warranty as long as the appropriate tests are conducted.

Hitachi Cable America operates a nationwide network of certified installers and should any issues arise, we can quickly be on site and resolve the situation.

WHO HOLDS THE WARRANTY?

Hitachi is one of the largest manufacturing companies in the world. We've been building technologically advanced products for over 100 years. You can rest assured that if you ever need us, we will be there. So when selecting cables for your next project and you want the best quality product backed by the best warranty in the industry, choose Hitachi Cable America.
